112 LAWS	20 DOMAINS	37 HARD GATES	9.5/10
Iron Laws R1-R112	Domains A through T	Zero Skipping	Ship Threshold

112 Laws | 20 Domains A-T | 37 Hard Gates | 142 Compliance Gaps Closed | April 2026

RTN Way is the one governing law. It supersedes all prior versions. It governs every module, portal, API, mobile app, and compliance obligation across the RTN Smart Loyalty platform. One fail = work stops. No exceptions.

TABLE OF CONTENTS

PART I THE ONE RULE + DELIVERY CHAIN + ROLES

PART II THE 112 IRON LAWS

§A R1-R36 Core Engine Laws — R1 through R36

§B R37-R65 Domain Laws — R37 through R65

§C R66-R80 Additional Platform Laws — R66 through R80

§D R81-R96 Online Market + Conversion Laws — R81 through R96

§E R97-R112 ★ NEW — Compliance + Security + Legal Laws

PART III THE 20 DOMAINS (A through T)

Domains A-R Original 18 Domains

Domain S ★ NEW — PCI DSS v4.0.1 + Security Certifications

Domain T ★ NEW — Legal, Privacy + Regulatory Compliance

PART IV THE 37 HARD GATES

Gates 1-31 Original Gates 1 through 31

Gates 32-37 ★ NEW — TCPA · WCAG · DR · SOC2 · ACH · Lottery

PART V RTN CASH — LEGAL DEFINITION + MTL BOUNDARY

PART VI ONLINE AUDIT STANDARD v1 (Full 44-Item Checklist)

PART VII COMPETITOR BENCHMARK TABLE (Live, April 2026)

PART VIII CEO WALL — PANEL A + PANEL B (8 Perspectives Each)

PART IX MISTAKE REGISTRY M001-M032

PART X SELF-HEALING TIERS T0-T4 + CHAOS ENGINEERING

PART XI AUDIT SCORECARD TEMPLATE

PART XII DEPLOY GATE SEQUENCE + KEY DATES

PART XIII COMPLIANCE ROADMAP TO NACS OCT 2026

PART XIV CONFIDENTIALITY + ENFORCEMENT

PART I — THE ONE RULE ABOVE ALL

RTN Way

FAIL ONE RTN WAY QUESTION IN YOUR DOMAIN = NOT QUALIFIED. WORK STOPS. RESEARCH RESUMES. NO EXCEPTIONS. NO WAIVERS. EVER.

DELIVERY CHAIN (Never Changes)

STEP	ACTOR	ACTION	REQUIREMENT
1	Claude	Builds	ZIP delivered · AST-clean · --sim GREEN
2	ZIP	Delivered	To Jipal for review
3	Jipal	Approves	R16 Two-Key — Jipal + Ajith both sign off
4	Raja	Wires	External scripts only — never engine
5	Ajith	Merges	CTO reviews every PR before merge

PART II — THE 112 IRON LAWS

R1 through R112

§A — LAWS R1-R36: CORE ENGINE LAWS

R1	KB Is The Passport — Search KB before any code. KB <5/10 = full stop.
R2	KB Sufficiency Score — KB must reach 7+/10 before coding begins.
R3	Module Must Register — Every .py has RTN_MODULE_REGISTRY dict.
R4	No Module Below 9/10 — Gate 0b enforced. Portal threshold = 9.5.
R5	KB Freshness — ACTIVE <30d · AGING 31-60d · STALE 61-90d · OBSOLETE 90+d.
R6	30-Min Auto-Update — APScheduler scans .py every 30 min.
R7	Error Code Register — TOTAL_ERROR_CODES locked. Register before use. Current=854.
R8	Domain Laws Supreme — DB CHECK constraints + F-field rules enforced at DB level.
R9	Three-Tier AI Heals — Module AI → Layer AI → Platform AI → Human last.
R10	Deploy Gates No Skip — Gate 0 → 0b → 1 → 2 → 3. Auto-monitored. No manual skip.
R11	Brutal Diagnosis — 5 adversarial perspectives before ship. Every module.
R12	One-Click Standard — Single URL. Zero manual steps. L1 live on install.
R13	Session-End Comparison — Competitor table every session close. 6 competitors, 8 dimensions.
R14	Self-Simulator Standard — --sim flag on every module. GREEN = ready. RED = blocked.
R15	Session Close Protocol — Memory update + KB update + final build + confirmation.
R16	Two-Key Approval — Jipal + Ajith both approve. No promo goes live without both.
R17	ALCS Token Daily Test — Live token ping every 24h. Silent fail = T3 alert.
R18	Pipeline Heartbeat — 8-point heartbeat every 15 min. Any red = immediate alert.
R19	DB Integrity Continuous — scan_merge CHECK constraint audit every hour.
R20	Multi-Store Isolation — StopNSave and HighPower share zero DB rows. DB level.
R21	First-Shot Standard — Every module ships correctly the first time.
R22	AI Embedded From Base — RTNModuleAI class in every module. Not optional.
R23	Self-Audit Before Delivery — Claude runs full audit before any ZIP is sent.
R24	No Reminder Rule — Claude never needs reminding of any rule. Ever.
R25	Mistake Registry — Every production mistake logged. Never repeats.
R26	End-to-End Heartbeat — Pipeline heartbeat is live monitoring, not batch.
R27	DB Integrity Check — Continuous, not just at deploy.
R28	F31 Write-Time Law — DB-level CHECK: F31 = Base-F22-F24-F26-F28-F30.
R29	Legacy Audit Gate — rtn_module_completion_checker --all exits 0 for Gate 3.

R30	Flutter RTN Way Coverage — Flutter modules pass D1-D10 domains.
R31	Customer Dedup Standard — phone+loyalty dedup enforced at INSERT.
R32	Fleet Error Learning — Error solved once = solved for all stores.
R33	Wiring Proof Law — Every module must be CALLED in a route. Live API call required.
R34	Void Exclusion Law — void_flag IS NULL OR void_flag=0 in every weekly SQL.
R35	Zero-Row Alert Law — Weekly job returns 0 rows → T4 alert. Never silent.
R36	Gate Auto-Trigger Law — gilbarco_counts gate fires automatically after day_close.

§B — LAWS R37-R65: DOMAIN LAWS (D1-D10)

D1=POS/GCL	D2=Database	D3=API	D4=Scan Data	D5=Payment PCI
D6=Flutter	D7=UI/UX	D8=CI/CD	D9=Monitoring	D10=GCL Law

Fail any Domain Law = NO SHIP. Domain specs in Part III.

§C — LAWS R66-R80: PLATFORM LAWS

R66	NJOY ACE Exclusion — NJOY ACE excluded from DTP incentives since Mar 29 2025. DB CHECK enforces.
R67	LFP Conflict Gate — LFP conflicts = human-gated ALWAYS. auto_fix_blocked=1 DB CHECK.
R68	AGDC No-Retry Law — AGDC SFTP: NO retry on auth failure. One attempt. Fail = T4 immediately.
R69	ITG Format Lock — ITG output = pipe-delimited .txt ONLY. Never JSON. Never CSV.
R70	Promo Pending Law — All AGDC promotions land as PENDING. Human approval before POS push.
R71	Validator Fail-Open — Validator must fail OPEN always. Never block a sale.
R72	Three-Audit Law — Every portal + website = 3 full audits minimum. Audit3 must score 9.5+.
R73	RTN Sync Law — Website + BOS + Portal + POS ship together. One package. Never partial.
R74	Receipt QR Messaging — "If you choose RTN Pay, you could save \$X." Never past tense.
R75	Order-Ahead Messaging — "Kitchen ticket prints at existing POS. Zero new hardware."
R76	PDF Font Law — All PDFs use embedded DejaVu TrueType fonts. Never PostScript.
R77	Config Chain Law — CLI → env → JSON → .env → default. Never deviate.
R78	EAIV Backend Only — EAIV full KBA never in Flutter. Age segmentation only. VERATAD=false.
R79	RTN Discount Terminal — Renamed from PAX Terminal. Routes through RTN Loyalty Gateway.
R80	Tech Partner Exclusion — Tech Partner Portal = EXCLUDED PERMANENTLY. Never build.

§D — LAWS R81-R96: ONLINE AUDIT + MARKET LAWS

R81	Public Pricing Law — Every merchant portal MUST display public pricing. Hidden = blocked.
R82	Self-Serve Trial Law — Every merchant portal MUST offer self-serve signup or 14-day free trial.

R83	Named Testimonial Law — Testimonials MUST include: real initials, store name, city, 1+ \$ metric.
R84	Trust Badge Law — 3+ trust badges above fold. AGDC/RJR/ITG/PCI/NACS/Gate3/SSL/G2.
R85	App Store Link Law — iOS App Store + Google Play links visible where consumer app referenced.
R86	Google SSO Law — "Continue with Google" on every signup and enrollment form.
R87	Dashboard Preview Law — Product preview with sample data visible within 2 scrolls.
R88	Competitor Table Law — Visual competitor table on every merchant portal. Min 5 rows, 4 competitors.
R89	Case Study Law — Named case study with store name, city, 3+ metrics, time-to-live.
R90	Live Chat Law — Chat or WhatsApp button visible in navigation bar. Footer-only = blocked.
R91	SEO Title Law — Page title contains primary keyword. "RTN" alone = blocked.
R92	Lorem Ipsum Law — Zero tolerance. Any placeholder text = immediate block. Automated scan.
R93	SSL + Copyright Law — All domains: SSL valid. Copyright = current year 2026.
R94	No Data Resale Law — Every portal must state RTN does not sell merchant or consumer data.
R95	Market Score Law — Every audit produces 1-10 market score vs top 3 competitors. Below 7 = blocked.
R96	Sitemap + Schema Law — Schema.org + OG tags + Twitter card + canonical + robots on every portal.

§E — LAWS R97-R112: NEW IN RTN Way COMPLIANCE · SECURITY · LEGAL · PRIVACY · OPERATIONS

- R97** **RTN Cash MTL Boundary Law** ★ NEW — RTN Cash = loyalty POINTS only (100pts=\$1). Zero stored monetary value. Zero money transmission. Zero MTL exposure. This is NOT a money transmitter. The line: ANY feature allowing consumers to load real dollars triggers 49-state MTL analysis by Jipal legal counsel BEFORE one line of code is written. RTN Gas Wallet = separate future route, deferred. Never build stored-value without legal opinion first.
- R98** **PCI DSS v4.0.1 Mandatory Law** ★ NEW — Three requirements became mandatory March 31, 2025 — RTN must comply: Req 6.4.3 = complete inventory of every script on payment pages with integrity monitoring. Req 11.6.1 = tamper-detection mechanism on all payment pages, checked minimum every 7 days. Req 8.4.2 = MFA required for ALL access to cardholder data environment, not just remote access. Additional: Req 10.4.1.1 automated log review, Req 5.4.1 DMARC/SPF/DKIM. All mandatory.
- R99** **SOC 2 Type II Roadmap Law** ★ NEW — SOC 2 Type II audit window must open before NACS October 2026. Budget \$15K-\$50K. Five Trust Service Criteria: Security (mandatory), Availability, Processing Integrity, Confidentiality, Privacy. 70% of VCs prefer SOC 2 startups. 33% of enterprise deals lost without it. SOC 2 adoption surged 40% in 2024. This is no longer optional for credibility.
- R100** **CCPA Financial Incentive Notice Law** ★ NEW — RTN loyalty program = "financial incentive" under CCPA Cal. Civ. Code § 1798.125. RTN MUST publish a Notice of Financial Incentive calculating: (1) value of consumer data collected, (2) how incentive is reasonably related to that value. Must be in privacy policy AND displayed at enrollment. CA AG has enforcement sweeps targeting loyalty programs. Penalty: \$7,500 per intentional violation, no right to cure. Required before Flutter app goes to App Store.
- R101** **TCPA 2025 Any-Opt-Out Law** ★ NEW — April 2025 FCC rule: RTN must honor ANY opt-out method from SMS recipients — including "leave me alone," "stop texting," or any informal expression of desire to stop receiving messages. Not just "STOP." Must be honored within 10 business days. Ajith must update Twilio opt-out handler to catch any-language opt-out signals. Exposure: \$500-\$1,500 per text, no cap on class action damages.
- R102** **WCAG 2.2 AA Accessibility Law** ★ NEW — All consumer-facing portals and Flutter app must pass WCAG 2.2 AA. Six new criteria vs 2.1: 2.5.8 Target Size 24x24px minimum on all interactive elements. 3.3.7 Redundant Entry auto-population on payment flows. 3.3.8 Accessible Authentication — no cognitive tests for login. 2.5.7 Dragging Movements — single-pointer alternatives. 2.4.11 Focus Not Obscured — no sticky headers hiding focus. ADA lawsuits +37% H1 2025. 77% target companies under \$25M revenue.
- R103** **OWASP MASVS 2.0 Mobile Law** ★ NEW — Flutter consumer app and merchant app must pass OWASP MASVS 2.0: MASVS-RESILIENCE: jailbreak/root detection, anti-debugging, code obfuscation, app integrity verification. MASVS-STORAGE: QR payment screens protected from screenshot (MASWE-0055). No PII in logs/backups/keyboard cache. MASVS-NETWORK: certificate pinning on all payment and loyalty API connections. MASVS-CODE: no debug features in production, third-party library vulnerability management.
- R104** **20-State Privacy Matrix Law** ★ NEW — A single privacy policy cannot satisfy 20 different state privacy laws simultaneously. RTN must maintain a compliance matrix covering: sensitive data definitions, opt-in requirements, minor protections (under-13 to under-16), cure periods (0-60 days), GPC signal compliance. States with active laws include CA, CO, CT, VA, TX, OR, MT, IA, IN, TN, FL, DE, NH, NJ, and more. Matrix must be reviewed quarterly. Legal counsel must validate annually.

R10 5	Tiered SLA Law ★ NEW — RTN must define quantitative uptime targets per service tier: Payment processing = 99.99% (52.56 min/year max downtime). Loyalty engine + portals = 99.95% (4.38 hrs/year). Internal tools = 99.9% (8.76 hrs/year). RTO targets: payments = 15 min, loyalty = 4 hrs. RPO: payments = near-zero, loyalty = 15 min. Backup standard = 3-2-1-1-0 (3 copies, 2 media, 1 offsite, 1 immutable WORM, 0 errors).
R10 6	Chaos Engineering Validation Law ★ NEW — T0-T4 self-healing claims must be validated through controlled failure injection, not assertion. Minimum: quarterly GameDay (full DR simulation), monthly controlled chaos experiment (network partition, node failure, dependency outage). Steady-state metrics define "healthy" quantitatively before experiments. AWS research: chaos engineering reduces unplanned events 20% and MTTR up to 90%.
R10 7	Vendor Risk Management Law ★ NEW — RTN must maintain a tiered vendor inventory covering all critical dependencies: ProPay/Global Payments, Circana, IRI, Apple, Google, Azure, Twilio, SendGrid, Anthropic. Tier 1 (critical): annual security assessment + contractual right-to-audit. Tier 2 (important): annual questionnaire. Tier 3 (standard): periodic review. New vendor onboarding requires security review before integration.
R10 8	DORA Metrics Law ★ NEW — RTN must track four key DevOps Research and Assessment metrics quarterly: Deployment Frequency (target: multiple per week). Lead Time for Changes (target: under 1 day). Change Failure Rate (target: under 15%; elite = under 5%). Mean Time to Restore (target: under 1 hour for SEV-1). These metrics are required for SOC 2 Type II Process Integrity criterion.
R10 9	Nacha ACH Compliance Law ★ NEW — Phase 2 Nacha fraud monitoring effective June 22, 2026 applies to ALL entities regardless of volume. RTN must: implement risk-based fraud detection for ACH transactions, determine if classified as Third-Party Sender (triggers annual audits + ODFI registration), use standardized Company Entry Descriptions. If processing 2M+ transactions: mandatory data encryption at rest required.
R11 0	BIPA Awareness Law ★ NEW — If RTN age verification for tobacco ever captures facial geometry or biometric identifiers through RTN servers (not purely on-device), Illinois BIPA requires: written consent before collection, public retention/destruction policy. Private right of action: \$1,000-\$5,000 per violation. Facebook settled \$650M. Google \$100M. Current EAIV = age segmentation only (no biometrics). Never add biometrics without legal review.
R11 1	Lottery Vendor Licensing Law ★ NEW — Each of the 30 states where RTN operates lottery management has independent vendor registration/certification requirements: background investigations, financial disclosure, bonding, and separate licensing per state. These are 30 separate regulatory regimes. RTN must build a state-by-state licensing matrix before expanding lottery to new states. WLA-SCS:2024 Level 2 certification increasingly expected by state lotteries for technology vendors.
R11 2	AI Governance Law ★ NEW — RTN AI-powered loyalty constitutes systematic profiling at scale. Required: AI system inventory (all models, all inputs, all outputs), model documentation/model cards, bias testing pipelines, human oversight mechanisms, audit trails linking outputs to source data. Colorado AI Act effective June 30, 2026. Texas TRAIGA already effective. EU AI Act high-risk rules August 2, 2026. ISO 42001 (AI Management System) certification = first-mover differentiator vs all c-store competitors.

PART III — THE 20 DOMAINS (A through T)

18 Original + 2 New

Domains A-R cover technical + product standards. Domains S and T cover compliance, security, and legal.

DOMAIN A	POS/GCL
POSLOYALTY 28-byte frame · bare XML never ns3: · BeginCustomer/EndCustomer send NOTHING · Verifone ns3: required · Wayne FTP · NCR SMB	
DOMAIN B	DATABASE
7 Azure DBs (rtn_global_master/store_ga_001/store_sc_001/lottery/website_db/reward_hub/member_db) · pool_pre_ping=True CRITICAL · atomic writes · rtn_loyalty_db=DISSOLVED NEVER	
DOMAIN C	API INTEGRATION
R33 Live API proof before declaring functional · ALCS expires 04/08/2028 renew 06/26/2026 · no hardcoded secrets · .env only	
DOMAIN D	SCAN DATA
AGDC=SATURDAY · RJR/ITG=SUNDAY · both due WEDNESDAY · void_flag=1 excluded always · NJOY ACE excluded · AGDC SFTP no retry on auth failure	
DOMAIN E	PAYMENT/PCI
PCI-DSS compliance · loyalty card numbers NEVER in PJR XML · ProPay via Ajith only · validator fails OPEN always · F38=exactly 6 numeric digits	
DOMAIN F	FLUTTER APP
EAIV age segmentation only · VERATAD_ENABLED=false · F39=Other app-based · dynamic store_id · MASVS 2.0 compliant (RTN Way)	
DOMAIN G	UI/UX STANDARDS
Plus Jakarta Sans · Bebas Neue · Navy #0A1628 · Gold #F59E0B · Green #10B981 · 9.5+ design score · WCAG 2.2 AA (RTN Way)	
DOMAIN H	CI/CD + DEPLOY
Flask+Waitress NEVER SocketIO · NSSM for Flask · cloudflared native · AST-clean Python · SAST+DAST+SCA in CI/CD (RTN Way)	
DOMAIN I	MONITORING
8-point heartbeat every 15 min · SSE /api/stream · T0-T4 tiers · MTTR/MTTD/MTBF tracking quarterly (RTN Way) · DORA metrics (R108)	

DOMAIN J**GCL LAW + LEGAL**

UOM: PK/CT/EA/CN/RL only · F29/F30=LFP · F25/F26=mobile coupons · F31=Base—F22—F24—F26—F28—F30 DB CHECK

DOMAIN K**MULTI-STORE**

StopNSave/HighPower share zero DB rows · store_id always from .env · fleet error learning · BOLA cross-tenant testing in CI/CD (RTN Way)

DOMAIN L**AI SELF-HEALING**

RTNModuleAI in every module · Three-tier healing · auto-fix 65% silently · chaos engineering validates claims (R106 RTN Way)

DOMAIN M**BACK OFFICE**

50 screens 9 modules · EventSource /api/stream · RTN Sync Law · rtn_global_master 15 tables · 87 tables per store DB

DOMAIN N**ENROLLMENT+CRM**

One-click AGDC+RJR+ITG simultaneously · 3-step wizard · Gate 3=4 clean SFTPs · SIGMA Apr27 · GACS May31 · NACS Oct6-9

DOMAIN O**SECRETS+CREDENTIALS**

ALCS expires 04/08/2028 RENEW before 06/26/2026 · SFTP rotated Apr12 2026 · all secrets in .env only · never hardcoded

DOMAIN P**COMPETITOR INTEL**

PDI/NRS/Patron/Petrosoft/Paytronix/SpotOn/Toast · R13 competitor table every session · RTN leads all competitors on integrated platform

DOMAIN Q**ONLINE MARKET PRESENCE**

Laws R81–R93 govern. Public pricing · self-serve trial · named testimonials+\$metrics · trust badges · app links · Google SSO · competitor table · case study · chat above fold. Score vs PDI/NRS/Patron/Toast required. Below 7/10 = BLOCKED.

DOMAIN R**CONVERSION/CRO**

Laws R86–R87–R89. Single CTA above fold · 3 required fields max · progress indicators · Google SSO · AHA moment on enrollment step 3 · exit-intent · mobile-first 375px breakpoint

DOMAIN S ★ NEW**PCI DSS V4.0.1 + SECURITY CERTIFICATIONS**

Laws: R98, R99, R103, R106, R107, R108 — NEW IN RTN Way — Governs all security certification and compliance requirements. PCI DSS v4.0.1 mandatory requirements (Req 6.4.3 script inventory, 11.6.1 tamper detect, 8.4.2 MFA CDE, 10.4.1.1 automated log review, 5.4.1 DMARC/SPF/DKIM). SOC 2 Type II audit window before NACS 2026. OWASP Top 10:2025 + API Security Top 10. SBOM generation. Secure SDLC: SAST + SCA + DAST + secrets scanning in CI/CD. Vendor risk management tiered program (R107). DORA metrics tracked quarterly (R108).

DOMAIN T ★ NEW

LEGAL, PRIVACY + REGULATORY COMPLIANCE

Laws: R97, R100–R102, R104, R109–R112 — NEW IN RTN Way — Governs all legal and regulatory compliance. RTN Cash MTL boundary (R97): points only, zero stored value, no MTL. CCPA financial incentive notice at enrollment (R100). TCPA 2025 any-opt-out within 10 business days (R101). WCAG 2.2 AA all portals + app (R102). 20-state privacy compliance matrix (R104). Nacha ACH fraud monitoring June 2026 (R109). BIPA awareness for biometrics (R110). 30-state lottery vendor licensing matrix (R111). AI governance framework NIST AI RMF + Colorado AI Act June 30 2026 (R112).

PART IV — THE 37 HARD GATES

31 Original + 6 New

Gate	Name	Requirement	Sev
GATE 0	DB Health Check	db_health_check exits 0.	HARD BLOCK
GATE 0b	Module Completion	rtn_module_completion_checker --all exits 0 + wiring_checker.	HARD BLOCK
GATE 1	SQL Migration	M01-M09 SQL run. M09 test suite 0 failures.	HARD BLOCK
GATE 2	Fix Application	rtn_l1_apply_all_fixes --apply --verify passes.	HARD BLOCK
GATE 3	L2 Activation	4 clean SFTP submissions (AGDC+RJR+ITG) → L2 activates.	HARD BLOCK
GATE 4	Score Threshold	No module <9.0/10. No portal <9.5/10.	HARD BLOCK
GATE 5	Three-Audit Law	All portals: 3 audits. Audit3 must score 9.5+.	HARD BLOCK
GATE 6	Sim Flag GREEN	--sim flag GREEN before delivery.	HARD BLOCK
GATE 7	AST Clean	All Python files pass AST. Zero syntax errors.	HARD BLOCK
GATE 8	API Live Proof	Every API module: live call confirmed WORKING.	HARD BLOCK
GATE 9	R16 Two-Key	Jipal + Ajith both approve. No exceptions.	HARD BLOCK
GATE 10	KB Score 7+	KB score 7+/10 before code begins.	WARNING
GATE 11	TOTAL_ERROR_CO DES	Assert passes at boot. 854 current (Ajith must confirm).	WARNING
GATE 12	Multi-Store Isolation	Zero shared rows StopNSave/HighPower. Verified by query.	HARD BLOCK
GATE 13	Void Flag Exclusion	Weekly SQL excludes void_flag=1. Automated check.	HARD BLOCK
GATE 14	Zero-Row Alert Active	Weekly job 0 rows = T4 alert. Never silent.	HARD BLOCK
GATE 15	ALCS Token Live	Token ping valid. Expired = T3 immediately.	HARD BLOCK
GATE 16	Heartbeat All GREEN	rtn_pipeline_heartbeat all 8 points GREEN.	HARD BLOCK
GATE 17	SFTP Credentials Valid	All SFTP tested before submission week.	HARD BLOCK
GATE 18	Flutter SMOKE Tests	108/108 smoke tests pass standard.	HARD BLOCK
GATE 19	CAN-SPAM Compliant	All forms: unsubscribe link + physical address in footer.	WARNING
GATE 20	SSL Valid All Domains	rtnsmart.com + realtnetworking.com + all product domains.	HARD BLOCK

GATE 21	Zero Lorem Ipsum	Automated scan: zero placeholder text in any public portal.	HARD BLOCK
GATE 22	Named Testimonials	Initials/name + store + city + 1 metric. Anonymous = blocked.	WARNING
GATE 23	Trust Badges Present	3+ trust badges above fold on all merchant portals.	WARNING
GATE 24	Google SSO Active	Continue with Google on all signup/enrollment forms.	WARNING
GATE 25	Competitor Table Present	Visual competitor table on all merchant portals.	WARNING
GATE 26	Case Study Present	Named case study with 3+ metrics on all merchant portals.	WARNING
GATE 27	Market Score 7+	Portal scores 7+/10 vs PDI/NRS/Patron Points/Toast.	HARD BLOCK
GATE 28	Public Pricing Visible	Pricing on page. No "contact us" only.	HARD BLOCK
GATE 29	Self-Serve Signup	Free trial or self-serve enrollment path exists.	HARD BLOCK
GATE 30	Chat Above Fold	WhatsApp/chat in nav bar. Footer-only = blocked.	WARNING
GATE 31	Copyright Current Year	Copyright = 2026. Wrong year = blocked.	WARNING
GATE 32 ★ ★	TCPA Opt-Out Compliant	NEW: Twilio opt-out handler catches any-language opt-out. Not just STOP. Tested before any SMS campaign.	HARD BLOCK
GATE 33 ★ ★	WCAG 2.2 AA Scan	NEW: Automated WCAG 2.2 AA scan passes on all consumer portals and Flutter app before ship.	HARD BLOCK
GATE 34 ★ ★	DR Test Passes	NEW: Disaster recovery test passes with RTO/RPO targets met before L2 full activation.	WARNING
GATE 35 ★ ★	SOC 2 Audit Window	NEW: SOC 2 Type II audit window opened before NACS Oct 2026. Auditor engaged.	WARNING
GATE 36 ★ ★	Nacha ACH Review	NEW: ACH compliance review completed before payment expansion beyond ProPay.	WARNING
GATE 37 ★ ★	Lottery License Matrix	NEW: State lottery vendor license matrix reviewed before expanding lottery to new state.	HARD BLOCK

PART V — RTN CASH LEGAL DEFINITION + MTL BOUNDARY

Law R97

**RTN CASH CURRENT STATUS: NOT A MONEY TRANSMITTER ZERO MTL
EXPOSURE — ZERO STORED VALUE — POINTS ONLY**

ELEMENT	CURRENT RTN CASH	FUTURE (IF REAL \$ ADDED)
What it is	Loyalty points only	Stored-value account
Unit of exchange	100 points = \$1 redemption	Real dollars held by RTN
How earned	Purchases, scan events, referrals	Consumer deposits cash
How redeemed	At RTN-enrolled stores via TCP GetRewards	Could be cashed out anywhere
Stored monetary value	ZERO — no dollars held anywhere	Yes — RTN holds consumer funds
Money transmission	NONE — no funds transfer	Yes — RTN transmits funds
FinCEN MSB registration	NOT required	REQUIRED
BSA/AML program	NOT required	REQUIRED
MTL (49 states)	NOT required	REQUIRED — 12-24 months per state
Surety bonds	NOT required	\$25K–\$500K+ per state
Legal exposure	ZERO	Federal criminal — 5 yrs / \$4M+ per state
BUILD STATUS	✓ LIVE — Safe to operate	★ DO NOT BUILD without Jipal legal counsel

RTN GAS WALLET = SEPARATE FUTURE ROUTE — DEFERRED Do NOT build until: (1) Jipal commissions 49-state MTL analysis from legal counsel, (2) Bank-sponsor model confirmed (Xplor/Clearent holds funds — RTN = program manager only), (3) FinCEN MSB registration filed, (4) RTN Way compliance domain expanded to cover full MTL requirements.

PART VI — ONLINE AUDIT STANDARD v1

44-Item Checklist

This checklist governs ALL 3 audit rounds for every portal. Any REQUIRED item that FAILS = portal blocked until fixed.

CREDIBILITY + TRUST

Requirement	Status
☐ Named testimonials: real initials + store name + city + 1 quantifiable metric	REQUIR ED
☐ Minimum 3 testimonials on merchant portals	REQUIR ED
☐ 3+ trust badges above fold (AGDC/RJR/ITG/PCI/NACS/Gate3/SSL)	REQUIR ED
☐ Case study: named store, 3+ metrics, time-to-live, POS system used	REQUIR ED
☐ Zero Lorem Ipsum, placeholder, "coming soon" visible anywhere	REQUIR ED
☐ SSL valid on all referenced domains	REQUIR ED
☐ Copyright year = 2026	REQUIR ED
☐ Physical address visible in footer	REQUIR ED

CONVERSION + CRO

Requirement	Status
☐ Public pricing visible on page — no "contact us" required	REQUIR ED
☐ Self-serve trial or free signup path exists	REQUIR ED
☐ 14-day free trial language explicitly stated	REQUIR ED
☐ "Continue with Google" SSO on all signup forms	REQUIR ED
☐ Product preview with sample data within 2 scrolls	REQUIR ED
☐ Live chat or WhatsApp in nav bar (not just footer)	REQUIR ED
☐ Primary CTA above fold — single, clear	REQUIR ED
☐ 3 or fewer required form fields	REQUIR ED
☐ No credit card required for free trial	REQUIR ED
☐ Progress indicator on multi-step forms	REQUIR ED

SEO + TECHNICAL

Requirement	Status
☐ Page title contains primary keyword (not just "RTN")	REQUIR ED
☐ Meta description 150-160 chars	REQUIR ED
☐ Full OG meta set (title, description, image, URL, type, site_name)	REQUIR ED
☐ Twitter card meta (card, title, description, image)	REQUIR ED
☐ Canonical URL set correctly	REQUIR ED
☐ Schema.org markup (Service or SoftwareApplication with offers)	REQUIR ED
☐ iOS App Store + Google Play links where consumer app referenced	REQUIR ED
☐ CAN-SPAM: unsubscribe link in all forms	REQUIR ED
☐ Mobile responsive at 375px breakpoint	REQUIR ED
☐ HTML parses without errors	REQUIR ED

COMPETITIVE POSITIONING

Requirement	Status
☐ Visual competitor comparison table (not just FAQ)	REQUIR ED
☐ Min 5 comparison rows, 4 competitors (PDI/NRS/Patron/Petrosoft)	REQUIR ED
☐ "Verify independently" disclaimer on competitor table	REQUIR ED
☐ RTN "no data resale" positioned vs NRS Digital Media / PDI/Skupos	REQUIR ED
☐ First-mover claim documented where applicable	REQUIR ED
☐ Market score documented (1-10 vs live competitors)	REQUIR ED
☐ Score is 7+ to ship, 9.5+ for Audit 3 pass	REQUIR ED

WCAG 2.2 AA (NEW RTN Way)

Requirement	Status
☐ 2.5.8 All interactive elements minimum 24x24 CSS pixels	REQUIR ED
☐ 3.3.7 Previously entered info auto-populated on payment flows	REQUIR ED
☐ 3.3.8 No cognitive tests for login (biometric/passwordless alternative)	REQUIR ED

☐	2.5.7 All drag interactions have single-pointer alternative	REQUIR ED
☐	2.4.11 Focused elements not hidden by sticky headers/footers	REQUIR ED
☐	Color contrast 4.5:1 normal text, 3:1 large text + UI components	REQUIR ED
☐	QR payment flows have accessible alternative for screen readers	REQUIR ED

CONTENT QUALITY

Requirement		Status
☐	Hero headline contains specific number or concrete claim	REQUIR ED
☐	Sub-headline answers "what do I get and when"	REQUIR ED
☐	Dollar metrics in testimonials are specific and from live stores	REQUIR ED
☐	No conflicting store count claims (52K target, 2 live — both clear)	REQUIR ED
☐	No future tense for live features	REQUIR ED
☐	All linked pages exist and load (no 404s)	REQUIR ED

PART VIII — CEO WALL: PANEL A + PANEL B

Mandatory Every Module

PANEL A — DEFENSE

Completeness	Does the module do everything it promises? No missing features, no empty routes.	___/10
Correctness	Does every calculation, formula, and logic path produce the right answer?	___/10
Error Handling	Does every error path resolve correctly T0-T4? No bare excepts.	___/10
DB Integrity	All DB CHECK constraints pass. F31 formula correct. void_flag excluded.	___/10
Security	No hardcoded secrets. All credentials from .env. PCI DSS v4.0.1 compliant.	___/10
Performance	pool_pre_ping=True. Atomic writes. No N+1 queries. 30s sync respected.	___/10
Test Coverage	--sim flag GREEN. All sim cases pass. RTNModuleAI present.	___/10
Documentation	Wire guide complete. Ajith can deploy without asking questions.	___/10

PANEL B — ADVERSARIAL

PDI Engineer	What would a PDI product manager say is wrong? Find their attacks.	___/10
Store Owner	What would confuse a 60-year-old store owner using this first time?	___/10
PCI Auditor	What PCI v4.0.1 violation risk exists? Script inventory? MFA CDE? Tamper detect?	___/10
VC Partner	What would Sequoia say about traction, scalability, SOC 2, moat?	___/10
Internal CTO	What would Ajith say is architecturally wrong? DB design? API contracts?	___/10
CRO Expert	What makes a store owner bounce in under 10 seconds?	___/10
SEO Expert	Does Google find this? Wrong title? Missing schema? Core Web Vitals?	___/10
Compliance Atty	CCPA incentive notice? TCPA opt-out? WCAG 2.2? BIPA? PCI v4.0.1?	___/10

PART IX — MISTAKE REGISTRY

M001-M032

25 Original + 7 New

Code	Never Repeat This Mistake
M001	Hardcoded store constants in .py files
M002	Wrong UOM: PACK or EACH instead of PK/CT/EA/CN/RL
M003	AGDC and RJR/ITG using same week-end day
M004	BeginCustomer/EndCustomer sent a response (must send NOTHING)
M005	Parsed BOOutBox before file was stable (no wait_for_file_stable)
M006	Wrong POSLOYALTY byte frame layout (old 4-byte BE prefix)
M007	Flask-SocketIO used (Waitress does not support WebSocket)
M008	Pre-v2.0 modules running without RTN_MODULE_REGISTRY
M009	NJOY ACE included in DTP incentives (excluded since Mar 29 2025)
M010	ALCS secret expired without renewal (silent CID = \$0)
M011	Gilbarco XML used ns3: prefix (Gilbarco = bare XML, never ns3:)
M012	LFP conflict auto-fixed without human gate
M013	AGDC SFTP retried after auth failure (no retry on auth failure)
M014	ITG output sent as JSON (ITG = pipe-delimited .txt only)
M015	AGDC promo pushed to POS without human approval (must be PENDING)
M016	Module built but never wired into route
M017	void_flag=1 rows not excluded from weekly query
M018	Weekly job silently skipped on zero rows (no alert)
M019	Gate triggered manually after day_close
M020	Anonymous testimonials ("Store Owner") shipped without name/metric
M021	Lorem Ipsum or placeholder text shipped in public portal
M022	SSL certificate expired on referenced domain
M023	Copyright year not updated to current year
M024	Competitor table in FAQ only — not as visual table on page
M025	Google SSO omitted from enrollment/signup form
M026 ★	★ NEW — RTN Cash described as wallet, stored-value, or money account (it is POINTS only)
M027 ★	★ NEW — PCI DSS v4.0.1 Req 6.4.3/11.6.1/8.4.2 ignored (mandatory since March 2025)
M028 ★	★ NEW — Flutter app shipped without WCAG 2.2 AA accessibility check
M029 ★	★ NEW — SMS campaign shipped without TCPA any-opt-out handler update
M030 ★	★ NEW — RTN Gas Wallet built without 49-state MTL legal analysis first

M031 ★	★ NEW — New state lottery feature shipped without checking vendor licensing requirements
M032 ★	★ NEW — AI feature shipped without model card, bias test, and audit trail documentation

PART X — SELF-HEALING TIERS T0-T4 + CHAOS ENGINEERING

Law R106

T0	Silent Auto-Fix	Auto-fix + log only. No human notification. Error resolved silently.
T1	Auto-Fix + Flag	Auto-fix applied + dashboard flag. Owner sees at next login.
T2	Owner Guided	Auto-fix attempted. Owner guided in plain English + screenshots.
T3	RTN Support Now	RTN Support email + full diagnostic bundle. Human resolution.
T4	Management Escalate	48hr open → Management + revenue impact calc. Zero rows = T4. Expired token = T4.

CHAOS ENGINEERING VALIDATION (R106 — NEW RTN Way)

Frequency	Activity	Goal
Monthly	Controlled failure injection (network partition, node failure, dependency outage)	Validate T0/T1 auto-fix claims
Quarterly	Full GameDay DR simulation — Ajith leads, all team participates	Validate RTO/RPO targets met
Post-incident	Blameless post-mortem within 48 hours	Add to known error library
Ongoing	Steady-state metrics define "healthy" before any experiment	Baseline required for comparison

PART XI — AUDIT SCORECARD TEMPLATE

Complete for Each of 3 Audits

AUDIT SCORECARD — RTN Way

Module / Portal:	_____	Audit #:	1 / 2 / 3
Auditor:	_____	Date:	_____

DOMAIN	LAWS	PASS/FAIL	SCORE
Domain A–J (POS/DB/API/Scan/PCI/Flutter/UI/CICD/Monitoring)	R71–R85	___	___/10
Domain K–P (Multi-Store/AI/BOS/Enroll/Secrets/Compliance)	R86–R96	___	___/10
Domain Q (Online Presence)	R81–R93	___	___/10
Domain R (CRO/Conversion)	R86–R89	___	___/10
Domain S ★ (PCI DSS v4.0.1 + SOC2 Roadmap)	R98–R99,R103	___	___/10
Domain T ★ (Legal/Privacy/Regulatory)	R97,R100–R105,R109–R112	___	___/10
Online Audit Standard v1 (all 6 sections, 44 items)	R81–R96	___	___/10
CEO Wall Panel A (Defense, 8 questions)	All domains	___	___/10
CEO Wall Panel B (Adversarial, 8 questions)	All domains	___	___/10
Market Score vs PDI/NRS/Patron/Toast	R95	___	___/10
COMPOSITE SCORE			___/10
SHIP DECISION			PASS (9.5+) / FAIL
BLOCKING ITEMS			
1.	_____		
2.	_____		
3.	_____		

PART XII — DEPLOY GATE SEQUENCE + KEY DATES

April 2026

Gate	Action	Owner
GATE 0	db_health_check exits 0	Auto
GATE 0b	rtn_module_completion_checker --all exits 0	Auto
GATE 0b	rtn_wiring_checker passes	Auto
GATE 1	M01-M09 SQL all run · M09 suite 0 failures	Ajith
GATE 2	rtn_l1_apply_all_fixes --apply --verify	Auto
GATE 3	4 clean SFTP submissions confirmed	Auto
GATE 3	rtn_pipeline_heartbeat all 8 GREEN	Ajith
GATE 3	Jipal + Ajith R16 Two-Key approval	Jipal
L2 LIVE	L2 discount delivery activates	Auto

KEY DATES — 2026

Date	Milestone	Status
Apr 13, 2026	□ Gate 3 LIVE — L2 activated	DONE
Apr 27, 2026	△ SIGMA Conference — Petroleum Jobbers demo. Veeder-Root IP needed.	PENDING
May 31, 2026	△ GACS Annual Convention — Association Portal demo required.	PENDING
Jun 22, 2026	★ Nacha ACH Phase 2 fraud monitoring — ALL entities regardless of volume.	URGENT
Jun 26, 2026	△ ALCS Client Secret RENEWAL DEADLINE (expires Jul 26).	URGENT
Jun 30, 2026	★ Colorado AI Act effective — AI governance required.	URGENT
Aug 2, 2026	★ EU AI Act high-risk rules effective.	PENDING
Oct 6-9, 2026	★ NACS Show Las Vegas — all 12 portals live. SOC 2 window opened.	PENDING

PART XIII — COMPLIANCE ROADMAP TO NACS OCT 2026

15 Steps · Priority Order

These 15 actions close the 142 identified compliance gaps and build toward a truly airtight standard (9.0/10+). Sized for a pre-seed company with 2 live stores. Jipal owns P0 items. Ajith owns P1 technical items.

Pri	Timeline	Action	What & Why	Owner
P0	This Week	TCPA opt-out handler	Ajith updates Twilio handler to catch any-language opt-out (not just STOP). Cost: 2 hours. Exposure without: \$1,500/text class action.	Jipal
P0	This Week	Privacy policy update	Add CCPA financial incentive notice to privacy policy before App Store submission Apr 17-20. Required: points value calculation + data use explanation.	Jipal
P0	This Week	RTN Cash legal opinion	Jipal commissions 1-page legal opinion: RTN Cash (points only) NOT a money transmitter. Cost \$500-\$2K. Required before investor conversations.	Jipal
P1	Before GACS May 31	PCI DSS v4.0.1 three reqs	Implement: Req 6.4.3 script inventory on payment pages, Req 11.6.1 tamper detection (7-day checks), Req 8.4.2 MFA on all CDE access. Ajith owns.	Ajith/Jipal
P1	Before GACS May 31	WCAG 2.2 AA automated scan	Run axe-core or Lighthouse accessibility audit on all 12 portals + Flutter app. Fix failing items. Gate 33 requires passing scan.	Ajith/Jipal
P1	Before GACS May 31	Flutter MASVS 2.0 check	Certificate pinning on loyalty/payment APIs. Screenshot protection on QR screens (MASWE-0055). No debug builds in production.	Ajith/Jipal
P2	Before Jun 22	Nacha ACH review	Determine if RTN classified as Third-Party Sender. Implement risk-based fraud detection for any ACH flows. Deadline is Phase 2 June 22, 2026.	Ajith/Jipal
P2	Before Jun 26	ALCS secret renewal	ALCS client secret expires Jul 26, 2026. Renew before Jun 26 — 30-day buffer. Hard gate — silent CID = \$0.	Ajith/Jipal
P2	Before Jun 30	Colorado AI Act readiness	AI system inventory. Model cards for RTN AI Brain v4. Bias testing pipeline. Human oversight documentation. Effective June 30, 2026.	Ajith/Jipal
P3	Before NACS Oct	SOC 2 Type II audit window	Engage auditor. Open observation window. Budget \$15K-\$50K. 3-6 month timeline. Must open by July for October readiness.	Ajith/Jipal
P3	Before NACS Oct	20-state privacy matrix	Build compliance matrix covering all 20 active state privacy laws. One policy cannot cover all. Legal counsel validates.	Ajith/Jipal
P3	Before NACS Oct	Vendor risk management program	Tier all critical vendors (ProPay, Circana, Azure, Twilio, Anthropic). Annual security assessment for Tier 1. Contractual audit rights.	Ajith/Jipal
P3	Before NACS Oct	DORA metrics baseline	Start tracking: deployment frequency, lead time, change failure rate, MTTR. Required for SOC 2 Process Integrity criterion.	Ajith/Jipal
P3	Q1 2027	ISO 27001 certification	Positions RTN against PDI and NCR. Provides ISMS framework for all other improvements. 12-18 month process.	Ajith/Jipal
P4	Q2 2027	ISO 42001 AI Management	First c-store tech vendor with AI management certification. Genuine first-mover differentiator. EU AI Act compliance path.	Ajith/Jipal

PART XIV — CONFIDENTIALITY + ENFORCEMENT

RTN Way

CLASSIFICATION	CONFIDENTIAL — Internal Use Only. Not for distribution outside RealTime Networking LLC.
OWNERSHIP	RTN Way is owned by Jipal Bhanvadia, CEO, RealTime Networking LLC. All rights reserved.
AUTHORITY	Jipal Bhanvadia holds final authority on all PASS/FAIL decisions. No override exists.
ENFORCEMENT	Violation of any Hard Gate (red) = immediate work stoppage. Violation of any Iron Law = rollback + full re-audit.
VERSION CONTROL	RTN Way supersedes ALL prior versions. There is only one version: RTN Way. Any prior document is void and disqualified.
AMENDMENT	New laws added by Jipal take effect immediately. Claude updates memory and KB within same session.
CLAUDE ROLE	Claude = Co-Architect. Never needs reminding (R24). Critic not yes-man (JIPAL STYLE LAW). Finds gaps Jipal missed.
RTN CASH	RTN Cash = loyalty points ONLY. Zero MTL exposure. RTN Gas Wallet = deferred, separate route. Never build stored-value without legal opinion.
